

OneSpan Advances DigipassONE to Help Organizations Put Modern Authentication into Practice

October 19, 2026

At Authenticate 2026, OneSpan previews its passkey Free Trial, shares an update on DigipassONE Verify and expands its identity and authentication expertise, building on the DigipassONE platform introduced in July

BOSTON & CARLSBAD, Calif.--(BUSINESS WIRE)--Oct. 19, 2026-- As passkeys, verifiable digital credentials and wallet ecosystems move into real-world deployment, organizations are working through how these technologies fit within existing customer journeys, security requirements and technology environments.

At Authenticate 2026, OneSpan Inc. (NASDAQ: OSPN) will highlight developments across [DigipassONE](#), the platform introduced in July, including a preview of its upcoming passkey Free Trial, and progress on DigipassONE Verify following its [early access](#) introduction, with general availability expected in early 2027. The event will also feature newly appointed OneSpan experts, Megan Shamas, Senior Director of Product Marketing, and Matthew Miller, Director of Product Management for Cybersecurity, who bring deep industry and technical expertise in identity and authentication.

Together, the updates reflect OneSpan's approach to modern authentication: helping shape where the industry goes next, translating deep authentication expertise into technology, and giving organizations practical ways to put new approaches into use.

"Passkeys and verifiable digital credentials are changing what organizations can do with authentication, but the real work is making those technologies effective within the environments and customer journeys organizations already have," said Ashish Jain, Chief Technology Officer at OneSpan. "That takes deep expertise across security, user experience, and infrastructure. We're bringing that expertise into DigipassONE and into the industry conversations helping define what good implementation looks like, so customers can put the right approach into practice."

Turning Authentication Strategy into Practical Progress

OneSpan will also preview the DigipassONE Authenticate Free Trial ahead of its anticipated November general availability. The trial creates a new, hands-on way for organizations to experience OneSpan technology, allowing users to explore passkey registration and authentication, work with the Web SDK and tutorial application, and evaluate how a web application connects to the platform.

For organizations evaluating where passkeys fit within their authentication strategy, the Free Trial provides a practical way to move from research to experimentation.

Strengthening the Expertise Behind DigipassONE

OneSpan has appointed Megan Shamas as Senior Director of Product Marketing and Matthew Miller as Director of Product Management for its Cybersecurity business. Both deepen OneSpan's identity and authentication expertise as the company advances DigipassONE and helps shape industry conversations around authentication and digital identity.

Shamas brings more than 20 years of experience in technology commercialization, marketing and communications. She spent the last decade building the market for FIDO authentication and passkeys, most recently as Chief Marketing Officer of the FIDO Alliance. An advocate for cross-industry collaboration and neutral education, she works closely with standards bodies and industry associations, including serving on the board of the foundation behind [whatarepasskeys.info](#) and [passkeys.dev](#). Earlier in her career, she helped build the U.S. market for smart card technology across payments, banking, government, mobile and transit. At OneSpan, she will lead product marketing for the Cybersecurity business, including positioning and go-to-market planning for DigipassONE.

Miller joins OneSpan from Cisco Duo, where he served as a Principal Engineer focused on achieving user-friendly passwordless authentication. He represented Cisco as an Editor in the W3C Web Authentication Working Group, served on the FIDO Alliance Board, and contributed to several FIDO Alliance working groups. In addition, Matthew wrote and maintains multiple FIDO2 libraries to make passkeys adoption easier for relying parties, stewarded [https://webauthn.io](#), and co-founded [https://passkeys.dev](#) and [https://whatarepasskeys.info](#) to help others learn about, experience, and implement FIDO2. At OneSpan, Miller will lead our passkeys product roadmap and delivery to guide the evolution of OneSpan's passkey offering and support customers in deploying passkey authentication. He will also continue to drive forward relevant identity standards towards these same ends.

The additions deepen OneSpan's investment in experts actively helping shape the future of authentication. Their work across standards, implementation, and market education puts them in the conversations shaping the industry's next steps, while bringing that expertise directly into OneSpan's product direction and customer guidance.

Helping Advance the Authentication Conversation

That expertise is on display throughout Authenticate 2026, taking place October 19–21 in Carlsbad, California where OneSpan leaders are helping advance industry conversations across five sessions spanning passkey implementation, authentication policy, digital wallets, credential migration and banking security.

- **Megan Shamas** and **Matthew Miller** will join Tim Cappalli of Okta for Passkey Developer Office Hours: You've Got Questions, We've Probably Got Answers, addressing practical questions about implementing passkeys.
- **Rolf Lindemann**, VP of Products, will join Karen Larson of the FIDO Alliance for Passkeys Meet Policy: Extending Your IAM Controls with the FIDO Metadata Service, examining how authenticator metadata can inform authentication policies.

- **Frederik Mennes** will join Jeremy Grant of Venable LLP for Hardening EUDI Wallets for Strong Customer Authentication Under PSR/PSD3, exploring technical and compliance considerations for European Digital Identity wallets.
- **Lindemann** will also present Seamless Identity Migration—The Next Frontier, examining secure credential migration across devices and mobile wallets.
- **Murtaza Hafizji**, Technical Product Marketing Manager, will present Banking Security Customers Love: From Login to Payment in the expo theater, demonstrating how DigipassONE supports a banking journey from passkey login through adaptive step-up and transaction signing.

Attendees can meet our subject matter experts and see our technology hands-on at the [OneSpan at booth #312](#).

OneSpan's market education continues beyond Authenticate. At the FS-ISAC Americas Fall Summit in Austin, October 26–29, Hafizji will present Securing Every Step of the Digital Banking Journey. On November 12, OneSpan will sponsor the FIDO Alliance webinar Passkeys Built for Banking: From Account Access to Transaction Approval.
